

Good afternoon , dear professors.It is my great honor to be here for this interview.

My name is Boqi Liu, and I grew up in Suihua, a very habitable city. My undergraduate period will be accomplished in Heilongjiang University in July,2024.And now, I am trying my best for obtaining a key to continue my study in your university.

My major is pharmaceutical engineering. During university, I've successfully passed CET-4 and CET-6 in my freshman year. In addition, my academic performance has always ranked in the top 40 percent in my major and never failed in any examinations.

Apart from academic studying, I've also participated in various activities, such as volunteering for the school celebration and visiting a pharmaceutical factory for studying.

I am an ambitious person who likes facing the challenges , overcoming the problems and keeping moving forward even if I meet setbacks . If I'm lucky to get the opportunity , I will spare no efforts to improve myself and grow into a highly qualified chemist.

Thank you!
